Domain Doctor™ is on its way!

The first Cloud-based monitoring application to provide full end-to-end configuration to resolution of domain and DNS servers.

Releasing soon!

We wanted to thank you for all the great feedback we have received during the previous beta releases.

We are now ready to unveil the release candidate which incorporates your feedback and ideas. Domain Doctor has a completely revamped diagnostic and domain records engine. We have also added Alert Notifications via email and SMS.

An amazing value

DNSstuff has always tried to provide tools and services that deliver significant value to our customers, while being mindful of the budget and resource realities you deal with. Domain Doctor is no different. When released, pricing will start at \$99/yr for 24/7/365 monitoring and alerting for a single domain, \$299/yr to monitor up to five domains, and \$499/yr to monitor 6-10 domains. Need more than 10, contact us for volume pricing. It's a time and money saving solution that can't be found anywhere at a comparable price.

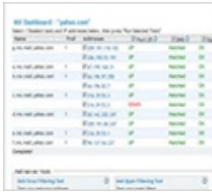

Free Trial!

You can access a 7 day fully functional free trial [here](#).

What's New:
